D																																																																	
	NOTES:																																																																
	MATERIAL:																																																																
	1. HOUSING: Brass, Nickel Plating.																																																																
	2. SEIZING PIN: 360 Degree Beryllium Bronze With Gold Plating. Accept Center Conductors That Range from 0.64mm to 1.07mm in Diameter.																																																																
C	3. INSULATOR: Dielectric Made of Nylon, Color to be White.																																																																
	4. NUT: Iron Plated With Nickel Over Copper.																																																																
	5. PLASTIC MATERIAL: ABS 94V-0.																																																																
	GENERAL SPECIFICATIONS:																																																																
	1. FREQUENCY RANGE: DC- 3 GHz.																																																																
	2. INSERTION LOSS: < 0.2 dB.																																																																
	3. RETURN LOSS: > 30 dB.																																																																
	4. CONTACT RESISTANCE: < 4 Milliohms.																																																																
B	5. HOLDING FORCE: > 160 Grams (Initial) > 120 Grams (After Insertion)																																																																
	6. Housing Shall Support 2.2 Kg Force Minimum Applied to Insulator From Either Direction.																																																																
	7. ENVIRONMENTS:																																																																
	TEMPERATURE: -40°C to 65°C																																																																
	RELATIVE HUMIDITY: 0% to 93%
